Find the show. Pick your seat. Walk right in.

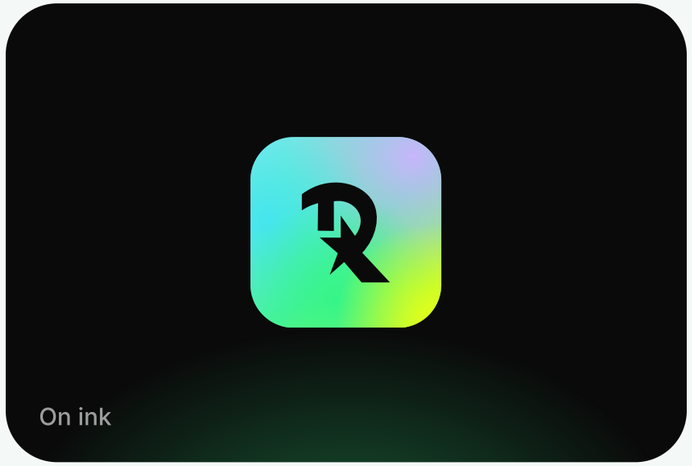

Tara brand kit. Colour, type, icons, components and six finished screens.

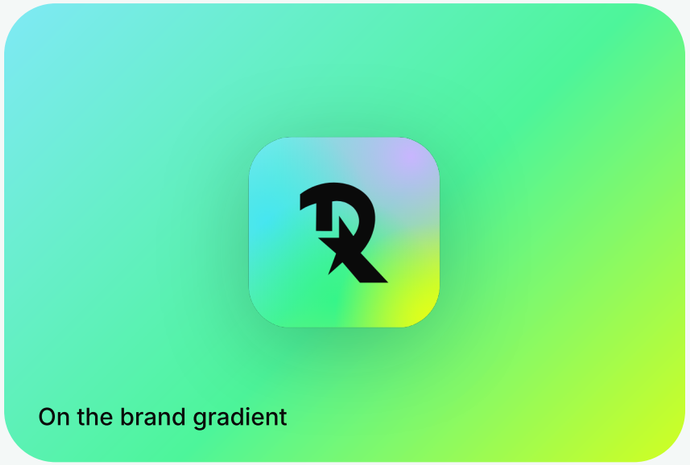

One glyph. A gradient that glows.

The mark is a flame-shaped T cut in ink over four soft light sources. Always use the supplied SVG, never rebuild or recolour the glyph.

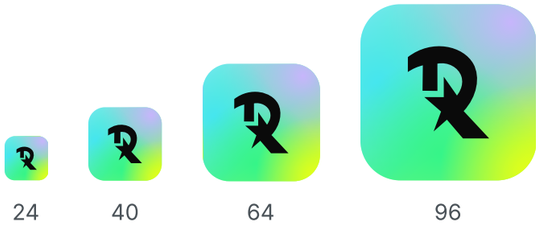

Clear space

Keep half the logo's width free on every side.

Minimum sizes

Below 24px, use the app icon only, with no wordmark beside it.

App icon shape

Corner radius is 22.7% of the side: 58 on a 256 canvas, 28 on a 124 canvas. Use the OS mask on iOS and export a full-bleed 1024 square.

The icon family.

Eight everyday versions plus three Android adaptive layers. Each one ships as SVG and as PNG at every store size.

Primary

Gradient tile, ink glyph. The icon for stores, the web and marketing.

`tara-icon-primary`

iOS full-bleed

Square with no rounded corners. iOS applies the shape itself.

`tara-icon-ios-1024`

Dark, gradient glyph

Ink tile with ambient light. For dark mode and night-time UI.

`tara-icon-dark`

Dark, white glyph

Ink tile, white glyph. Quiet version for dense screens.

`tara-icon-dark-white`

Light

White tile, ink glyph. For light documents and receipts.

`tara-icon-light`

Glyph, black

Black glyph on transparent. Single-colour print, stamps, light backgrounds.

`tara-glyph-black`

Glyph, white

White glyph on transparent. For photos and dark backgrounds.

`tara-glyph-white`

Glyph, gradient

Brand gradient glyph on transparent. For dark backgrounds with room to glow.

`tara-glyph-gradient`

Neutral stage, one light source.

Seventy percent neutrals, twenty-five percent brand triad, five percent lilac. No single brand colour owns a screen.

Text on colour is always ink.

The brand colours are bright. White text on them fails, and ink on them clears AAA. Light comes from stacked soft glows, never from heavy shadows.

Pair		Ratio	Result
Ink	on mint	13.75:1	AAA
Ink	on lime	17.09:1	AAA
Ink	on aqua	13.07:1	AAA
Ink	on lilac	10.95:1	AAA
White	on ink	19.80:1	AAA
Slate	on cloud	7.43:1	AAA
White	on mint	1.44:1	Do not use

Glow recipe

Stack soft radial lights from the edges over ink: lilac top right, aqua left, mint bottom, lime corner. Keep opacity under 0.45 behind text. On light screens, use aqua and lilac only.

Athletic headlines. Quiet body.

Plus Jakarta Sans for anything you shout, Inter for anything you read, JetBrains Mono for anything a scanner or a box-office clerk reads.

`ticket-id` `11 / 14 · 700`	`TRA-9X4K-77Q2`

Squircles and floodlights.

Corner radii echo the app icon. Depth comes from light: a hairline, a soft lift, and colour-tinted glow for what matters.
